

COUNTER-INSURGENCY It's More Than

Dust'n Crops

Which is why the SM-27 MACHETE™ is the Best Choice for Tomorrow's COIN, CAS, FAC and AISR. Designed by Americans as an All New, From-the-Ground-Up dedicated Light Attack solution, the SM-27 Machete family of next generation combat aircraft will be produced in both Turboprop (SM-27S/T) and Turbofan (SM-27J/L) variants. Armed with a fixed 30mm cannon and eight external stores hardpoints, Machetes will carry up to 8,000 lbs of external loads while maneuvering at 7.5 g. Produced in single seat strike and two seat tandem configurations, the Machete is designed for continuous operations within harsh environments with minimal support requirements. A heavily armored, battle-hardened war machine, only the Machete will combine precision firepower with extreme survivability, performance, integrated sensors/avionics/EW and economy.
