

# SM-27T MACHETE

## Turboprop Advanced Trainer,

## COIN, CAS & FAC

# For the RAAF

### **SM-27T Machete: An Ideal Successor To Royal Australian Air Force PC-9As.**

A fully aerobatic, yet stable and forgiving Fly-By-Wire training platform, the SM-27T could add new dimensions to the RAAF, serving not only as an Advanced Trainer, but also as a Light Attack, Counter-Insurgency and Close Air Support Aircraft. With 9-g maneuvering, stepped seating and probe-and-drogue style in-flight refueling, the SM-27T will be a premier 6th generation fighter trainer. With a fixed 30mm cannon, 8 external stores hardpoints, advanced radar and the ability to carry a 6,500 lb warload over a tactical radius of 750 nm on internal fuel, The SM-27T is a valuable solution for precision attack and maritime patrol. Now under development, the SM-27T could begin satisfying anticipated RAAF requirements by 2013.
