**SM-27J: Turbofan CAS/COIN/FAC**

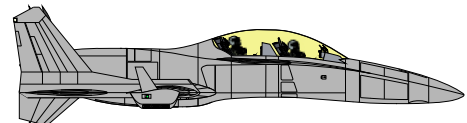

**SM-27L: Turbofan CAS/Lead-In Fighter**

**SM-27S: Turboprop COIN/CAS/FAC**

**SM-27T: Turboprop COIN/CAS/FAC**

**SM-27AT: Turboprop Advanced Trainer**

# ***Stavatti Machete: The Complete Solution***

The Machete is a family of aircraft that will perform more roles with greater flexibility, reliability and economy than any other combat aircraft. Whether the mission is Advanced Training, COunter-INSurgency, Close Air Support, Forward Air Control, Anti-Armor, Defense Suppression, Maritime Patrol, Armed Reconnaissance, Interception or Air Defense, the Machete will be the only aircraft in the world which may be procured as a turboprop, a turbofan or as an afterburner equipped supersonic fighter/trainer.

Benefiting from a modular cockpit that may be interchanged between aircraft, individual planes may become single seat, two seat tandem or unmanned/autonomous air vehicles in 60 minutes or less. An all-weather, day or night capable combat aircraft, the Machete is pure innovation. Now under development, Machete variants will enter production between 2013 and 2016.
