**TEAC America, Inc.  
Booth 2919**

**TEAC**

TEAC has been designing and manufacturing Airborne Video Tape Recorders (AVTR™) for over twenty years. TEAC invented AVTR™ technology and remains the leader in the industry, continually producing innovative and high quality video products. With nearly 15,000 TEAC AVTR™s in use in the world today, TEAC is the name more military and aerospace customers turn to when they need to meet the mission.

**Teledyne Ryan Aeronautical  
Booth 1502**

The Tier II Plus Global Hawk is America's most capable unmanned aerial vehicle and the Department of Defense's newest reconnaissance system. Advanced technology sensors, a range greater than half way around the world, and the ability to remain on station for long periods of time will enable the Tier II Plus Global Hawk to provide the war fighter with the essential intelligence needed to achieve information dominance throughout the battle space, well into the 21st century.
