Subject: SensorCraft Brief for STAVATTI Team

Rich

Thanks for the invite to the STAVATTI briefing today. They truly have an innovative mindset for both technology and development schedule challenges. It's always invigorating to hear a message like that delivered by the STAVATTI team today. I also want to thank you for hosting the impromptu briefing on SensorCraft as a motion in the spirit of reciprocity.

Per your request, I've attached a ~~valuable~~ **briefing to pass forward to STAVATTI and I** appreciate your motion to do so.

Lastly, I would like the opportunity to discuss with you our (AFRL-SensorCraft) thoughts regarding a more formidable relationship regarding the development and execution of a more "aggressive technology" portfolio and the process improvements necessary for concurrent and/or accelerated tech transition. Our thoughts go far beyond the existing Applied Technology Council (ATC) construct. We believe an opportunity for more aggression in technology and it's transition may be on the horizon due to the "Constellation Enterprise" thinking taking place at AC2ISRC (and AFMC) as part of the MMA program. It's this opportunity we would like to exploit as a "unified team" between acquisition and S&T. We would certainly benefit from your perspectives and recommendations.

Thanks

Floyd Paul Johnson, Team ISR
