Mr. Christopher R. Beskar
President & CEO
Stavatti Corporation
1061 Tiffany Drive
Eagan, MN 55123-1877

Dear Christopher:

Thanks for the information on the Stavatti Corporation. You certainly have extensive plans, both in the aerospace defense area, as well as military and general aviation aircraft. I have to admit that until I received your information, I was unaware of the depth or background of your corporation.

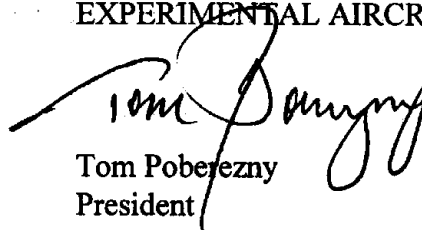

I appreciated the comments concerning the impact that aviation has had upon you and the role that EAA has played. For many, aviation is a passion . . . a love of flight. I can see that is true for you and your family.

You mentioned that the company was incorporated in July of 1994. Since it's had a relatively short lifespan, I assume that most of the projected products and aircraft you are talking about are in the design stages.

I appreciate your recognition of EAA and the work that has been accomplished by myself and my father. We look forward to receiving additional information as your designs go through prototype stage and enter the marketplace. I am optimistic about aviation's future.

Sincerely,

EXPERIMENTAL AIRCRAFT ASSN.

Tom Poberezny
President
