30 March 2009

Industry Partner Meeting with Hybrid Technology, Inc.

On Monday March 30th, Stavatti CEO Chris Beskar met with Hybrid Technology General Manager Norman Giebeler. Chris and Norman discussed Hybrid's industry partnership with Stavatti to manufacture high performance prototype and production machined components for landing gear, fuselage, wing, and empennage assemblies. The meeting also covered high-performance pumps and next generation general aviation aircraft turbine development and production.

Hybrid Technology is based in San Bernardino, California, and designs, develops, and manufactures Sure Lock™ high pressure cement heads for the oil and gas drilling industry. In addition, Hybrid serves as a leading designer and manufacturer of high-performance machined components including landing gear assemblies, subsystems and components for the aerospace industry. Aerospace legacy products Hybrid include landing gear systems for the C-130A, Neptune and additional aircraft. Hybrid is a Stavatti Industry Partner.

Stavatti Aerospace is an innovative aerospace defense enterprise focused on the design, development, and production of next generation aerospace vehicles. Stavatti Aerospace is a division of Stavatti Corporation, a privately held American Corporation with a CAGE Code of 1DRG1.
